## Project Highlights

### INDUSTRIAL HYGIENE

- **General Electric Company:**  
Provided several divisions of GE with third-party industrial hygiene consulting services and compliance assistance in order for the company to meet environmental and health and safety regulations. The GE divisions included jet engine and avionics manufacturing, engine testing and electric generator maintenance. Verified safe workplace conditions during the demolition or renovation of a number of buildings at GE's Ohio operations.
- **L'Oréal USA:** Served as L'Oréal's third-party safety, industrial hygiene and environmental coordinator during renovation and expansion of its Florence manufacturing facility, the company's largest construction project in North America. Helped L'Oréal and its primary contractor achieve zero lost-time accidents and only two OSHA recordable incidents during the 271,000 contractor man-hours worked on the project. Helped the project team earn special recognition from the Kentucky Occupational Safety and Health Program under its Construction Partnership Program for exemplary leadership in the prevention and control of occupational safety and health hazards on a major construction project.

Free up your time to manage your facility with our services tailored to meet your needs.

POWER can help you avoid or reduce employee exposures and injuries.

### ENVIRONMENTAL COMPLIANCE

- **B&G Foods North America:**  
Provided B&G the high level of support it needed to make sure all of its facilities had an effective program for achieving compliance with environmental regulations. Managed environmental permitting, reporting and compliance at B&G's seven food processing plants and three warehouses. Created comprehensive calendar of items each site needed to comply with regulations.
- **Confidential Multinational Automotive Parts Manufacturer:**  
Provided permitting and compliance support for five facilities in New Hampshire. Created an electronic database for efficiently tracking one facility's chemical use and air emissions. Identified a strategy to comply with new regulations.
