PRODUCT CATALOG

The World Of
Healthcare Is
Complicated Enough.
Together We Can
Do Something
About It.

Bionix® is an innovative medical device company dedicated to a singular idea:

We want to help those who help others.

To that end, the Bionix team is invigorated to imagine and innovate. We help healthcare professionals improve efficiencies of traditional procedures to provide better quality outcomes and enhance patient satisfaction. We collaborate with clinicians to identify these challenges and produce innovative product solutions.

1

Inquisitive: Identifying everyday challenges ignites our pursuit of innovation.

2

Experienced: Collaborating with trusted medical professionals to advance the healthcare industry and enhance medical treatments.

3

Innovative: Creating simple solutions to improve the level of patient care and satisfaction, while optimizing the financial benefit of efficiency.

4

Empathetic: Measuring our success by patient and medical provider feedback allows us to continually improve patient care and comfort.

5

Evolving: Constantly monitoring patient comfort and well-being drives us to target reliable and effective procedures and results.

Innovative Solutions for Everyday Problems

OUR PROMISE

At Bionix, we will never stray from the very notion of what made us who we are today. We will continue to focus on developing useful, simple, innovative medical devices that help those who help others.

We are doctors, nurses, medical supply experts and inventors. We are professionals who see the medical device industry through a different lens. A lens of curiosity that is wrapped in knowledge and experience. A lens that helps us develop products that are so simple, yet so impactful, that our customers have come to count on us to provide real innovation.

Bionix is always innovating and bringing to market products that help our therapists, doctors and clinicians to be the very best they can be.

2299 Lanyard for Light Source

Grip and Grab • Bionix Lighted Forceps combine illumination and magnification to help healthcare providers take less time to see and safely remove ear canal and nasal obstructions.

Patient Care • The forceps help quickly grasp and extract the foreign body relieving the patient at a possibly anxious time.

“ I love this tool! My patients and their families, and my own daughter, are so thankful for the effectiveness and comfort of this wax and foreign body removal system! ”

Laurie Hursley, CNCP

Easy to use grips to activate forceps

Designed with gripper teeth the Forceps can accommodate objects as large as 5mm

Lighted Suction

2625 Lighted Suction

Includes: 25 Handles, 1 Light Source, 1 Magnification Lens, 25 Silicon Suction Tips for foreign bodies 

2630K Pump for Lighted Suction Device

Kit containing pump, 6' tubing and 10' tubing

2635 10' Tubing for Lighted Suction Device

Suction Power • Bionix Lighted Suction combines illumination and magnification with the efficiency of a suction device, to help healthcare providers take less time to see and safely remove ear canal and nasal obstructions.

Patient Result • Relieving the patient from obstructions, like beans and beads, is quickly accomplished with the suction tool.

Removable suction tip makes this tool effective for both cerumen plugs and round foreign bodies in the ear and nose

Thumb controlled suction design

40/box  

7202 OtoClear® Ear Irrigation Tips

20/box  

Redefining Irrigation • Bionix OtoClear Ear Irrigation helps healthcare workers provide safe and comfortable ear irrigation without the backsplash, at half the cost of a self-constructed device.

Patient Care • When the canal will benefit most from an effective flush, the system dispenses water without getting everyone wet.

Flared tip design prevents over insertion

The three stream tip cleans the ear without directly spraying the tympanic membrane. This is less painful and safer for the patient

Threaded design makes this tip compatible with all our delivery devices and any luer lock fittings meeting ISO compliant standards

“ Bionix OtoClear tip and delivery device is the most efficient tool I have ever used. Not only is it my preferred product choice because of efficiency, it’s also the most cost effective compared to the others. Highly recommend! ” Dan Ramirez, NP-C

IRRIGATION LIKE NO OTHER

Bionix offers various configurations to meet your irrigation needs

Disposable Speculum

9877 Disposable Speculum
48/box

9878 Disposable Speculum
20/box

Who “Nose” What’s Up There? • Bionix Disposable Speculum helps healthcare providers improve nasal airway field of view with a single patient use, lightweight speculum.

Patient Care • This speculum is made of a pliable material that is more gentle on the nose tissue, reducing any discomfort during inspection.

Plastic tips are warmer than metal
therefore less alarming and more
comfortable for the patient

The Key to Health

NOURISHMENT ISN'T
A WANT BUT A NEED

Innovative Solutions for Everyday Problems

ENTERAL CARE

Patients need to be nourished and receive proper medication to heal, increase strength and gain independence. This often requires a great deal of support and care. Working in conjunction with healthcare professionals, we developed devices that ensure your patients receive the nourishment needed for treatment and healing to take place.

These Products Support:

.....
Feeding Tube Care
.....

.....
Feeding Care
.....

Enteral Feeding Tube DeCloggers® CE ②

911 Blue DeClogger®
(14-16 Fr./39.5 cm)
10/box

912 Yellow DeClogger®
(16-22 Fr./39.5 cm)
10/box

913 Green DeClogger®
(20-22 Fr./39.5 cm)
10/box

921 Brown DeClogger®
(14-16 Fr./ 21.5 cm) - Peg Type
or Replacement Type
10/box

922 Orange DeClogger®
(18-24 Fr./21.5 cm) - Peg Type
or Replacement Type
10/box

935 DeClogger® Variety Pack
1 of each style of DeClogger
5/box

The Path Is Clear • Bionix DeClogger helps healthcare providers clear obstructed J, G and PEG tubes in less than two minutes to restore medication delivery. Prevent untimely tube replacements and unnecessary patient transports.

Patient Care • The DeClogger system minimizes procedures and risks, ultimately preventing unnecessary tube replacements and costly procedures while eliminating interruptions for feeding and medication delivery.

“The DeClogger has greatly reduced my need for tube replacement.”

Scott Polsky, M.D.

Stopper to prevent over insertion

Variety of sizes ensures successful clog removal

Flexibility and conformity reduces the risk of tube puncture which makes a safer procedure for the patient

GastroFlush®

9500 GastroFlush® Relish RL
1501 Jet Lavage (Needed to operate GastroFlush)

9510 GastroFlush®
10/box and 1 syringe ②

GastroFlush® is for enteral feeding tubes with integral ENFit® connectors only. It is NOT to be used with Drain Tubes or ENFit transition adaptors. ENFit® and NRFit™ are trademarks of GEDSA.

Go With The Flow • Bionix® GastroFlush® with ENFit® connection helps providers safely clear feeding tube obstructions and avoid emergency feeding tube replacement at a fraction of the cost of a new tube.

Patient Care • Avoid an emergency tube replacement with the GastroFlush® system which quickly and effectively clears the existing tube. This reduces the need for transportation between facilities for specialty tube replacement or repair.

Compatible with ENFit® connection only

In-line patency check valve allows users to quickly check occlusion during declogging without removing GastroFlush

Anti-back flow valve catches over pressure and prevents irrigation unit cross contamination

“ Medical supply companies today don’t create products anymore, they simply copy them. Bionix is still one of the inventors in our business, they understand what we need.”

SafeStraw™ Drinking Aid

1500 Thin Liquid SafeStraw™
Drinking Aid (White)
12/box

1510 Thick Liquid SafeStraw™
Drinking Aid (Blue)
12/box

1520 SafeStraw™ Drinking Aid Variety Pack
6 Thin Liquid SafeStraw™ Drinking Aid and
6 Thick Liquid SafeStraw™ Drinking Aid
12/box

202 SafeStraw™ Drinking Aid
for Thin Liquid (White)
1/box 

212 SafeStraw™ Drinking Aid
for Thick Liquid (Blue)
1/box 

Consistently Controlled •

Bionix SafeStraw™ Drinking Aid allows healthcare providers to safely manage swallowed liquid volume and help reduce aspiration in patients with oral motor dysfunction.

Patient Care •

Patients with oral motor dysfunction can independently and confidently control liquid intake and reduce premature swallowing, ultimately reducing aspiration concerns.

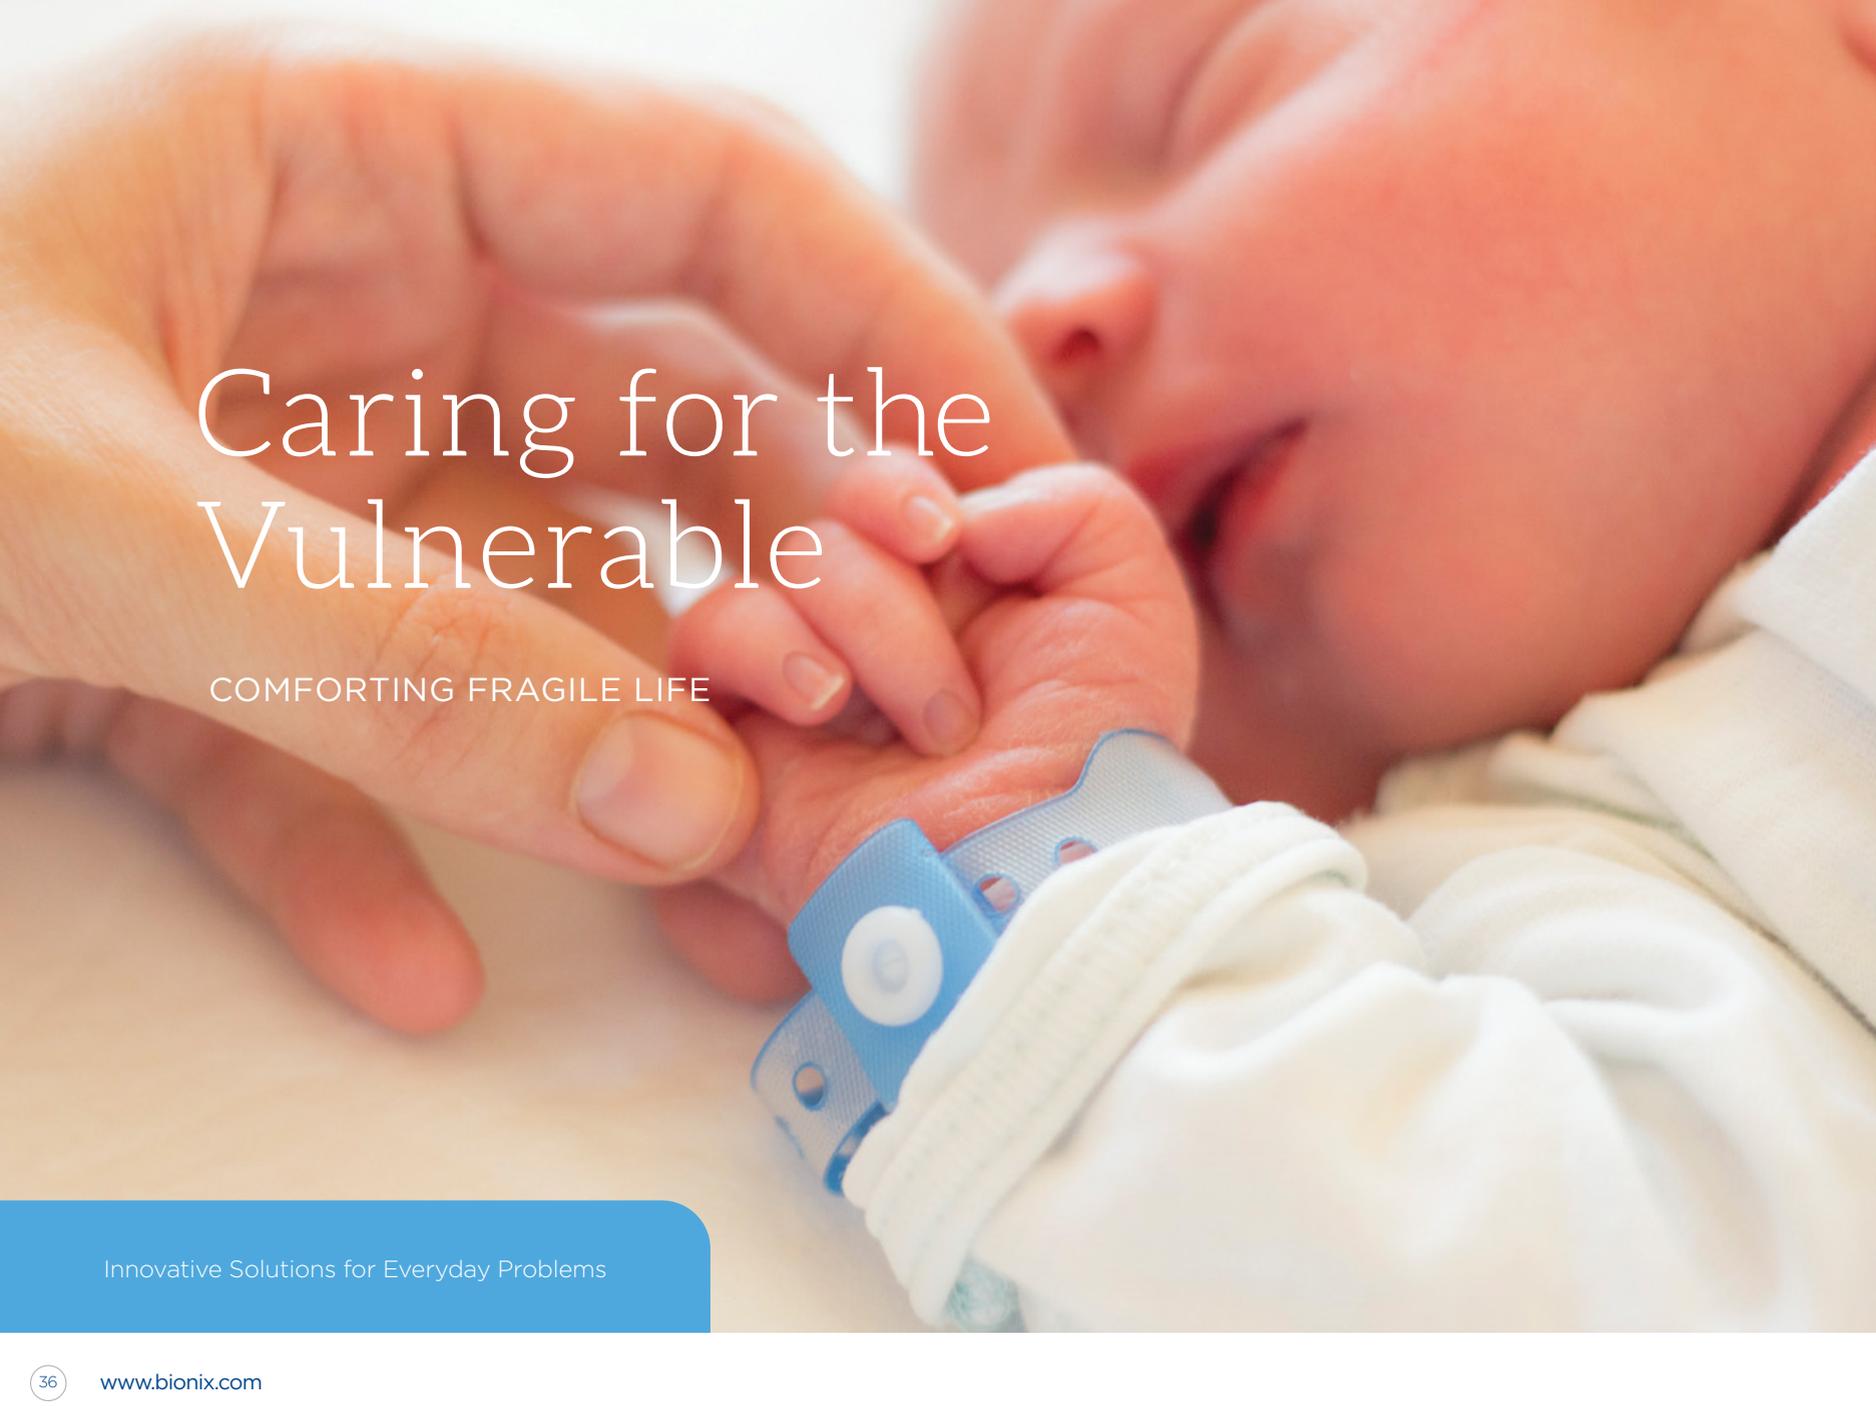

Compatible with
standard 1/4" drinking
straw

“ By limiting volume per suck, it has also prevented aspiration in my patients who have decreased oral motor control following a stroke. It makes my patients feel safe and dignified, as they are able to discreetly use the device in restaurants after leaving the hospital. ”

Jennifer Hanners, SLP

Invented by a Speech Language Pathologist to safely deliver a controlled bolus size of approximately 6.2 ml (or 1 tsp.) to individuals with swallowing dysfunction

Caring for the Vulnerable

COMFORTING FRAGILE LIFE

Innovative Solutions for Everyday Problems

INFANT CARE

Whether full-term or premature, babies need to be cared for with the utmost consideration for their acute sensitivities. Bionix provides solutions for the caregiver to ensure proper comfort and stability during the crucial first days and weeks so infants can successfully transition home.

Recognizing the intense stages of early life, Bionix supports your commitment to caring for those who cannot care for themselves.

Product Solutions:

.....
Swaddler for Phototherapy
.....

.....
Preemie Hand Splint
.....

.....
Preemie Transport Blanket
.....

Swaddler for Phototherapy ②

- 1100** Preemie Swaddler for Phototherapy 10/box
- 1105** Newborn Regular Swaddler for Phototherapy 10/box

Swaddled For Comfort •

Our swaddler gives caregivers the ability to administer critical phototherapy treatments while providing a familiar, comforting barrier that allows over 85% light transmittance.

Patient Care • Maintaining swaddling during phototherapy treatment can help alleviate stress on the newborn and parents.

Preemie Hand Splint ②

- 1150** Preemie Hand Splint 5/box

Properly Positioned •

Bone and joint growth are so critical in a preemie's development, so we designed a hand splint that prevents cortical thumb positioning without having to create custom devices.

Patient Care • The soft splint promotes healthy hand alignment and development.

Preemie Transport Blanket ②

- 1125** Low Birth Weight Transport Blanket 15/box
- 1126** Very Low Birth Weight Transport Blanket 15/box

Wrapped With Care •

Designed to help maintain an infant's core internal temperature during transport it also provides full, immediate access to the torso should urgent care be required.

Patient Care • The Transport Blanket helps extremely delicate patients thermoregulate.

Reduce Anxiety of Injections

IMPROVING
PATIENT
EXPERIENCE

Innovative Solutions for Everyday Problems

INJECTION RELIEF

The anxiety felt by many individuals, especially children, when receiving shots can be overwhelming for the patient, parent and the medical professional. Bionix is focused on creating devices that improve patient satisfaction, outcomes and overall experience.

Using the Gate Control Theory of Pain as a basis, we focus on saturating the brain with sensory inputs to mask the feeling of pain.

Useful For:

.....
Immunizations and Vaccinations
.....

.....
Diabetes Care
.....

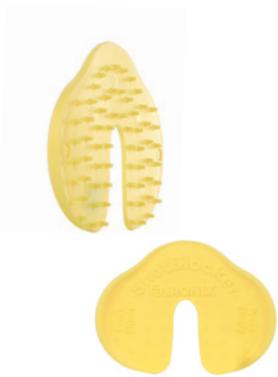

.....
Fertility Treatments
.....

ShotBlocker® CE ②

8050 ShotBlocker®
50/box

8100 ShotBlocker®
100/box

801-P ShotBlocker® OTC
1/box 🏠

Shots With Ease •

Bionix ShotBlocker helps healthcare providers quickly minimize needle pain associated with injections, removing the need for cream or spray that take time to be effective.

Patient Care • Creating a positive experience for caregiver and patient by reducing shot anxiety.

Design based on the Gate Control Theory of Pain

Instant results with the ShotBlocker vs. topicals that can take up to 30 minutes

“ Fantastic!!!! The children in my practice ask for it (ShotBlocker) before the visit begins. Parents too. It works well and is so incredibly simple.” Frank J Domino, M.D.

A close-up photograph of a healthcare professional in blue scrubs holding a patient's hand. The professional has a stethoscope around their neck and a name tag. The patient's hand is resting on a light-colored surface. The background is softly blurred, showing another person in white scrubs.

Patient Safety First

PARTNERS FOR A SAFER
TOMORROW

Innovative Solutions for Everyday Problems

PATIENT SAFETY AND COMPLIANCE

Bionix has developed a line of innovative patient safety products dedicated to equipping healthcare institutions and providers with tools to assist in meeting the high-pressure demands of constantly changing healthcare safety regulations. Partnering with you to provide documentable results for compliance testing of key systems, while keeping patient safety a priority.

Products Available:

Healing Patients, Protecting Healers

CARE GOES BOTH WAYS

Innovative Solutions for Everyday Problems

WOUND CARE

Caring for wounds can be messy and even dangerous for those administering the care. The Bionix line of irrigation products helps thoroughly clean your patient's wound and surrounding tissue while simultaneously protecting you, providing a safer and cleaner environment for all involved.

Procedures Supported:

.....
Wound Irrigation
.....

Igloo® Wound Care

5100 Igloo® Wound Irrigation System (sterile) 10/box 
Note: Saline not included

5250 Igloo® Wound Irrigation Shields (sterile) 25/box 

5500 Igloo® Wound Irrigation Shields (sterile) 50/box 

601 Igloo® Wound Irrigation OTC 1/box 

Shield Yourself • Bionix Igloo® Wound Irrigation helps healthcare providers protect staff by preventing backsplash of blood pathogens during high volume irrigation of non-complex wounds.

Patient Care • Using this high volume wound irrigation system will effectively remove bacteria and necrotic tissue.

“I find Bionix products valuable in my everyday practice. Whether adults, children, or staff members, Bionix has usable tools to get the job done.”

Frank J Domino, M.D.

A woman with dark hair, wearing a grey t-shirt, is smiling as she showers a baby in a white bathtub. She is holding a black handheld showerhead, and water is spraying onto the baby's head. The baby is leaning on the edge of the tub, looking up at the woman. The background is a light blue wall with a window.

ABOUT BIONIX

A HISTORY OF STRENGTH IN COLLABORATING SINCE 1984

Doctor Andrew Milligan Ph.D., a professor in Radiation Oncology at the Medical College of Ohio at Toledo, and Doctor James Huttner, M.D., Ph.D., and practicing Pediatrician, founded Bionix Development Corporation. As close friends, they recognized the opportunity to evolve the healthcare industry by uniting their medical expertise and inquisitive nature. Their focus was simply to develop solutions that would change the way procedures were performed and, ultimately, improve the level of care patients received.

Since 1984 Bionix has continued to evolve, yet the soul of our purpose remains unchanged. Today, Bionix encompasses more than 100 individuals devoted to listening and meeting the needs of health professionals like no one else in our industry. We're fueled by collaboration to develop simple solutions for everyday problems.

CONNECTING TO THE POSSIBILITIES OF TOMORROW

Our success is measured by the impact we share in helping those who help others throughout our industry. Our focus has continued to advance our industry experience by connecting our product solutions across the continuum of care.

Bionix serves both medical professionals and over the counter consumers throughout the domestic and international markets. Our variety of product lines, formerly known as the Bionix divisions of Health at Home, and National Safety Technology are now defined as OTC Care and Patient Safety and Compliance.

Innovative Medical Devices That Help Those Who Help Others

All Ideas Are Welcome!

To submit your product idea for consideration, please go to our website.

Our Innovation Team will respond to let you know the submission has been received. Once evaluated by our intimate team of reviewers, you may be asked to sign our non-disclosure agreement to properly learn more about your invention.

We look forward to partnering with you!

SUBMIT YOUR INNOVATIVE PRODUCT IDEA, CONCEPT OR PROBLEMS

At Bionix, we are always looking for exciting new medical products that solve everyday problems encountered by medical professionals. We are built on innovation and try to create an open and welcoming inventor relationship. With your help in innovation and collaboration, we can continue to provide healthcare solutions that create positive patient outcomes.

There is no need for a prototype or initial design work; we can help take the idea you have and bring it to conception. Our team values agile development and purpose-driven communication. This permits you, the inventor, the opportunity to collaborate directly with the Product Development Team as necessary.

WHAT WE ARE LOOKING FOR

We are searching for unique and practical devices that offer innovative solutions to everyday problems.

- FDA Class I or II
- Patented or patent pending
- Single use or single patient use
- Easy to understand and use

Who we serve:

- Acute Care
- Government
- Long Term Care
- Over the Counter - Consumer
- Primary Care
- Urgent Care

1

OUR PROCESS

Innovation concepts are submitted through several sources. All idea submissions are reviewed for relevancy by our Product Development Team and assigned a score based on what we are looking for.

2

Concepts are evaluated by our cross-functional team for prioritization.

3

Our Product Development team works directly with the inventor and/or trusted industry contacts to gather all information available for the concept.

4

All collected and submitted information is reviewed for final evaluation.

5

Our Product Development Team will schedule a review of all information with the inventor. Final details of partnership with Bionix are finalized.

It is the policy of Bionix to share any and all information gathered throughout the idea evaluation process with the inventor.

ALWAYS EVOLVING

The original curettage standard of care used metal curettes which were known to possibly cause pain or trauma to the ear. Dr. Huttner saw an opportunity to redesign this common tool using plastics and the success of this improved procedure inspired the launch of the company Bionix. Since inception, Bionix continues to evolve the tools used for curettage and other procedures like foreign body removal, comfortably caring for patients.
